

Future Categories for Tech Due Diligence

We need to consider what the future of Tech Due Diligence will be like so that we can provide more value to Private Equity investors and provide a future-proof offering.

Technical workforce diversity and inclusion

New ideas and innovation benefit from hiring people who think outside the (tech) box.

Ethical considerations

As AI becomes more prevalent, we need to ensure tech is both fair and ethical.

Social responsibility

We need to measure the technology impact on the environment and community.

Energy efficiency

Tech DD can assess energy consumption and whether firms use and promote energy-efficient measures.

Innovation

Innovation is, of course, essential for companies that rely on technology for their competitive advantage.
